

Neck Through

Specifically for securing and displaying multiple bottles in one pack, the neck through multipack offers a sustainable alternative to plastic wrap.

Features

- Carton sheet loops over bottles from base, with bottle necks pushing through die cut holes
- High quality, lithographic print, added value embellishment and finishing techniques
- Camera controlled precision flat bed hot foil blocking and die cutting

Options

- Variety of market-tested boards, finishes and sizes
- Plain or printed, varnished, foiled, embossed/ debossed
- 4, 6 or 8-pack formats available
- Choice of glued, or unglued with a tuck lock

Benefits

• Impactful branding opportunity while grouping and protecting your products

 \mathbf{D}

- Bottles are held secure due to the 'neck through' format
- Runs down automated lines, speeding up the packing process
- Benefit from our team's expertise for machine installation and engineering support services

Design for Sustainability

- Multipack cartons are an environmentally friendly alternative to plastic wrap
- FSC Certified materials available
- 100% recyclable
- Benefit from our CAD layout know-how to find the best format to generate minimum waste
