

# Reverse Panel Tuck-in

The reverse panel tuck-in feature offers re-closable functionality at both ends of your packaging. Often used in pharmaceuticals and cosmetics, it reduces the amount of gluing required.

## Features

- Tuck lock closure at either end of the pack for two points of access
- High quality, lithographic print, added value embellishment and finishing techniques
- Camera controlled precision flat bed hot foil blocking and die cutting

## Options

- Variety of market-tested boards, finishes, formats and sizes
- Plain or printed, varnished, foiled, embossed/debossed
- Choice of both tucks on one side (see Same Panel Tuck) or on alternate sides of the pack

## Benefits

- Tuck locks provide robust closures to secure and protect your products within
- Runs down automated lines, speeding up the packing process

## Design for Sustainability

- Elevate your carton from single use to multi use by adding re-closable tuck lock closures
- No taping or gluing required once packed, saving cost and materials
- FSC Certified materials available
- 100% recyclable
