

# Sleeves

Generally designed as a simple layer of protection over your secondary packaging, sleeves are an environmentally friendly alternative to plastic wrap, while also offering an additional area of branding opportunity.

## Features

- Simple wraparound form, or including base for support and rigidity
- High quality, lithographic print, added value embellishment and finishing techniques
- Camera controlled precision flat bed hot foil blocking and die cutting

## Options

- Choice of board thicknesses and finishes
- Plain or printed, varnished, foiled, embossed/ debossed
- Options of thumb cuts or dropped edge for ease of product removal, or flush edge for maximum coverage and protection
- Opportunity to add a crash-lock, tuck-lock or flat glued base for product support

## Benefits

- Impactful branding opportunity for additional shelf standout
- Cost effective premium addition to you packaging
- High quality and knowledgeable service

## Design for Sustainability

- Carton sleeves are a sustainable alternative to plastic wrap
- FSC Certified materials available
- 100% recyclable
- Reduce packaging waste by ordering your secondary packaging from McLaren Packaging, already packed within our protective sleeves and loaded into our corrugate cases - One Stop Purchasing
